DETAILED ACTION

This Office Action is in response to the Appeal Brief filed on December 2, 2004.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

This application is in condition for allowance except for the presence of claims 13-19 non-elected without traverse. Accordingly, claims 13-19 have been cancelled.

Allowable Subject Matter

Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art references, alone or in combination, do not show a semiconductor device comprising a capacitor formed over an insulating film, a silicon oxide (or additional insulating film) formed over the capacitor to serve as an upper planarized surface, wherein nitrogen resides all over the planarized surface of the silicon oxide (or additional insulating film), and a wiring formed over the silicon oxide (or additional insulating film) including

nitrogen. As stated in the applicant's arguments, the prior art references (particularly Arita) only show that the nitride layer is formed on the planarized surface after a wiring layer is formed. Therefore, the nitride layer of Arita is not formed all over the planarized surface of the upper oxide layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
